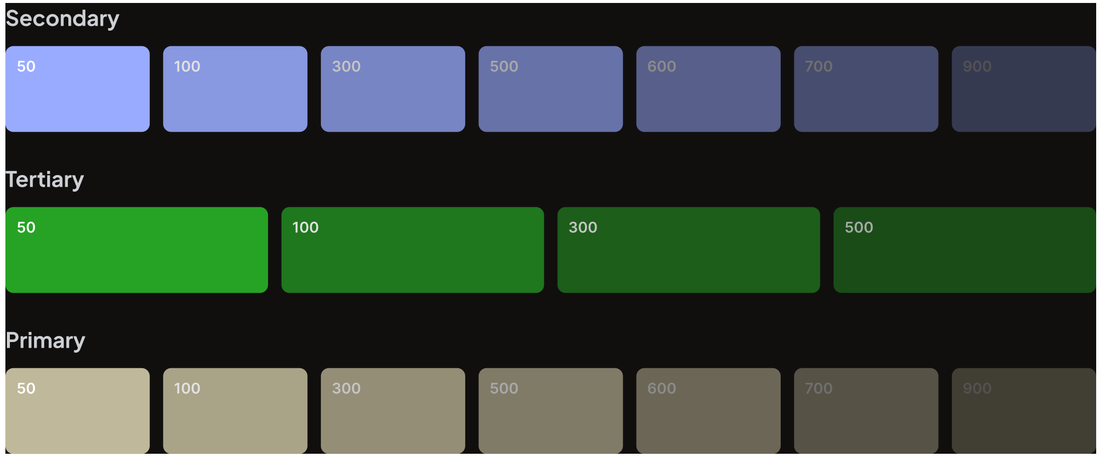
Example Colour Palette

P4 phospor tint
#99ACFF - Primary Accent

P1 Phosphor
#33FF33 - Secondary accent

Computational Beige
#C0B89B - Brand Primary

Console Black
#12100E- UI Background



Colour System Guidelines

1. Limit palette to 3 main colors.
2. Use accent colors sparingly.
3. Ensure text contrast meets WCAG.
4. Maintain color consistency.
5. Use color to guide action.
6. Test color blindness modes.
7. Group content by color coding.
8. Use neutral backgrounds.
9. Document system updates.

Design Philosophy

The visual language should support exploration rather than compete with it. Every design decision should help players navigate, understand, and enjoy the experience without unnecessary complexity.

Exploration First	Clarity Over Decoration	Consistency Builds Trust	Gameplay Comes First	Design for Growth
ENCOURAGE CURIOSITY AND DISCOVERY THROUGH CLEAR NAVIGATION AND MEANINGFUL INTERACTIONS.	PRIORITISE USABILITY AND READABILITY BEFORE VISUAL COMPLEXITY.	REUSABLE PATTERNS SHOULD BE PREFERRED OVER UNIQUE SOLUTIONS.	THE INTERFACE SHOULD SUPPORT THE GAME—NOT DISTRACT FROM IT.	THE SYSTEM SHOULD REMAIN SCALABLE AS NEW FEATURES AND GAME MECHANICS ARE INTRODUCED.

Design Philosophy

The visual language should support exploration rather than compete with it. Every design decision should help players navigate, understand, and enjoy the experience without unnecessary complexity.

Exploration First

ENCOURAGE CURIOSITY AND DISCOVERY THROUGH CLEAR NAVIGATION AND MEANINGFUL INTERACTIONS.

Clarity Over Decoration

PRIORITISE USABILITY AND READABILITY BEFORE VISUAL COMPLEXITY.

Consistency Builds Trust

REUSABLE PATTERNS SHOULD BE PREFERRED OVER UNIQUE SOLUTIONS.

Gameplay Comes First

THE INTERFACE SHOULD SUPPORT THE GAME— NOT DISTRACT FROM IT.

Design for Growth

THE SYSTEM SHOULD REMAIN SCALABLE AS NEW FEATURES AND GAME MECHANICS ARE INTRODUCED.

nents

nts should follow a consistent
sure a predictable user
e application.

ument:

le)

Property	Example
Width	Auto/Fill Container
Height	48 px
Border Radius	12 px
Padding	16 px
Margin	8 px Grid
Typography	Body medium
Icon size	20-24 px
Elevation	Level 1
State Variants	Default, Active, Disabled

Layout & Spacing

Always use a grid!

The layout system provides a structured framework for organising interface elements, creating consistency, readability, and predictable user interactions across the application.

A consistent spacing system improves readability, simplifies development, and creates a balanced interface.

LAYOUT GRID

8 px

4 columns: Margin 24 px
Gutter 16 px

8-point spacing system

4 px
8 px
16 px
24 px
32 px
48 px
64 px

Border Radius

Buttons: 12 px
Cards: 16 px
Input Fields: 12 px
Images: 16 px

Note:

This layout serves as a reference only. Developers may adjust the number of columns, margins, and gutters to suit their chosen framework while maintaining consistent alignment and spacing.

n States

ent should clearly define its
t user interactions to ensure
e platform.

Recommended States

- Default
- Hover (Desktop)
- Pressed / Active
- Focused
- Disabled
- Loading
- Success
- Error
- Selected

Mobile Guidelines

- Minimum touch target: 44–48 px
- Consistent 8 px spacing system
- Minimum body text: 16 px
- Icons: 20–24 px
- Clear visual hierarchy using spacing and
- Maintain sufficient colour contrast for ac
- Provide visible feedback for every user i
